

Approvals and conformities

Conforms to specification(s) : « Food Chemicals Codex »

MANUFACTURER : Babb Co (FR)

DESCRIPTION / APPLICATION(S) :

ACTIVE CHARCOAL in granular prepared from wood by chemical activation. This coal is particularly recommended for the treatment of wastewater from preemulsified penetrants.

Companion products : /

DIRECTIONS FOR USE

Wet carefully the active charcoal (approximately 48h) in order to avoid loss of charcoal (still floating) during the initial washing against current.

Rinse then the burden of activated charcoal against a current in order to eliminate dust (25m/h) and to cause an expansion of approximately 20%.

The clean water is then sent on activated charcoal from top to bottom at a speed of approximately 10 m/h.

To achieve peak performance, it is necessary to depack the column of activated carbon CA 270 regularly against the current. You can consult us for the implementation.

Frequency suggested: every month at least.

TECHNICAL CHARACTERISTICS

Dimensions of pores :	from 0,4 to 6000 nm and 80% between 0,4 and 10 nm.
Granulometry	> 1,6 mm 5 % max; < 0,4 mm 3 % max.
Specific surface (N2) :	1700 to 1800 m ² /g
Volumetric weight	190 to 220 kg/m ³
